

Excellence in Painting... and People

CASE STUDY

New Home Construction

> We understand the needs of builders and WE DELIVER!

New home construction requires a team of high calibre, expert trades to execute jobs to the highest standards. From early budgeting numbers to final completion and quality control, Applied Colour has the expertise and experience to deliver the best for the builder and their customer.

The Applied team will work hand in hand with on site project managers, site supervisors and other project leaders to coordinate timing and execution of painting at all phases of build. We have the scale to move quickly and efficiently on tight deadlines and not hold up other trades or building processes.

Our quality control is ongoing and done through every step of the project. Our painters are constantly checking their own work and our team leaders conduct a full inspection of the job when it's completed. So whether you're looking at single family, multi residential or strata builds, we have the knowledge and expertise to deliver what you need!
